To whom it may concern,

It has been my pleasure to have the American Youth Motor-Sports Team (AYMT) participate at Children's Healthcare of Atlanta at Hughes Spalding. Their program provides time for our patients to escape their illnesses and enrich their lives. The children have been able to see and sit in miniature racing cars giving them a taste of the thrill of racing all while hearing about safe participation in motor sports. I have seen patients who were suffering from the effects of an illness have an immediate positive change in personality all as the result of the enjoyment, laughter and diversion this organization has brought to our hospital. In addition, the team has been very generous with their time, donations of pictures, stickers, hats and goody bags.

The population served by Hughes Spalding is one of children who have very little. They are thrilled and excited to have such a reputable and caring team of individuals visit our institution and spend their very valuable time engaging our children in the excitement of motor sports. They are meticulous in their attention to outlining and reinforcing the safety measure necessary to participate in these sports and even other non-motorized sports such as biking and skate boarding encouraging the use of helmets and protective gear.

Overall, our experience and that of the children, has been extremely positive and fruitful. I recommend your support of this organization as it will allow for continued dedication to the needs of our patients with an experience that will enhance and augment their daily life experience.

Sincerely

Robert Pettignano, MD, FAAP, FCCM, MBA
